Fecha revisión: 2029

Resumen: aprenderaprogramar.com se ha integrado en el Joomla Resource Directory (directorio de recursos Joomla) tras haber superado los requisitos establecidos por el JRD Team, un equipo de la comunidad Joomla que evalúa la calidad de las empresas que aspiran a integrarse en el directorio.

Autor: Redacción aprenderaprogramar.com

APRENDERAPROGRAMAR.COM PASA A FORMAR PARTE DEL JOOMLA RESOURCE DIRECTORY

El área de programación y desarrollo de software de aprenderaprogramar.com ha pasado a constar en el Joomla Resource Directory (directorio de recursos para la comunidad Joomla) tras haber superado los requisitos establecidos por el JRD Team, un equipo de la comunidad de software libre Joomla CMS que evalúa la calidad de las empresas que aspiran a integrarse en el directorio.

Desde aprenderaprogramar.com llevamos varios años apostando por el CMS de software libre Joomla, uno de los gestores de contenidos para desarrollos web más utilizados en todo el mundo.

Dentro de nuestra línea de actividad de diseño y desarrollo de páginas, portales y aplicaciones web la utilización de Joomla ha adquirido gran relevancia en los últimos años y ha permitido que podamos ofrecer desarrollos web basados en este CMS con muy buen nivel de satisfacción para nuestros clientes, tanto en pequeñas páginas web como para portales web de mayor envergadura.

Hemos alcanzado un alto nivel de especialización en el uso de algunas extensiones de gran uso entre la comunidad como K2, Phocagallery, Akeeba BackUp, Sobi2, Virtuemart, XMap, etc. (sería demasiado extenso tratar de listarlas todas), y además mantenemos abierta la línea de desarrollo de extensiones (componentes, módulos, plugins) como desarrollos de software a la medida de las necesidades de nuestros clientes.

Todo ello nos llevó a tomar la determinación de solicitar nuestra inclusión en el Joomla Resource Directory, un directorio de recursos para personas y empresas que desean buscar empresas o proveedores que ofrecen productos y servicios en el ámbito de Joomla.

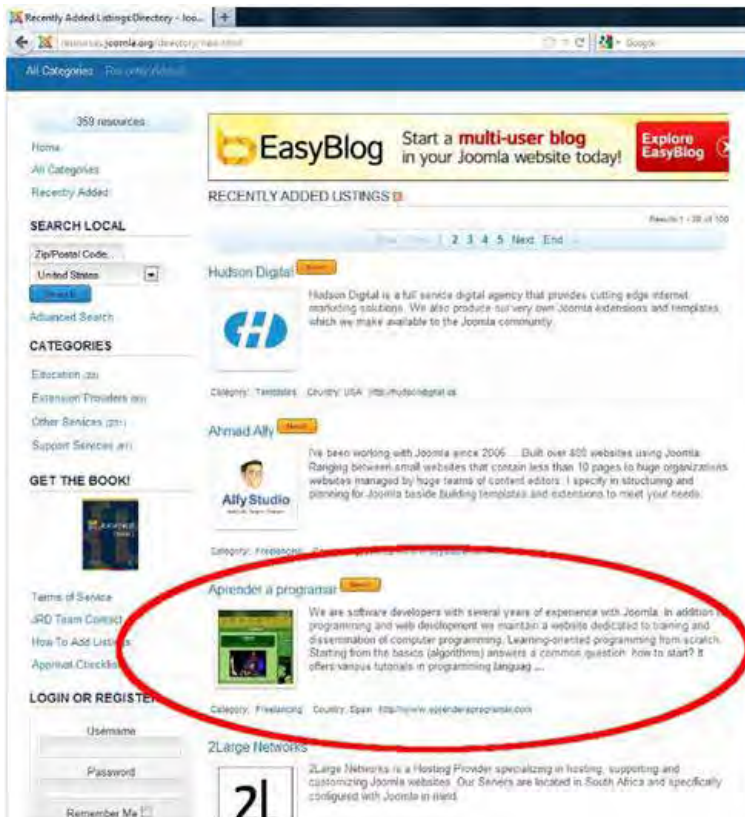

El Joomla Resource Directory se estructura en diferentes áreas. aprenderaprogramar.com podría encajar en varias de ellas, como "Designer & Developer Tutorials" ó "User & Administrator Tutorials" dado que hace varios años que ofrecemos cursos relacionados con Joomla, Joomla! Press Books (Official Joomla Books), dado que hemos editado el título "Creación y administración web con Joomla. Curso paso a paso" con ISBN 978-84-613-6499-2 y quizás varias otras. No obstante, se optó por solicitar la inclusión en la categoría de Freelancing como forma de aportar un aval adicional para nuestros clientes a la hora de confiarnos desarrollos web.

AREA DEL JRD	CATEGORÍAS (SUBÁREAS)
Education	<ul style="list-style-type: none"> • Designer & Developer Tutorials • Joomla! Press Books (Official Joomla Books) • News & Informational • User & Administrator Tutorials
Extension Providers	<ul style="list-style-type: none"> • Components, Modules & Plugins • Templates

AREA DEL JRD	CATEGORÍAS (SUBÁREAS)
Other Services	<ul style="list-style-type: none"> • Consulting • Freelancing (-- > aprenderaprogramar.com) • Graphic Design
Support Services	<ul style="list-style-type: none"> • Content Translation • Hosting • Legal Assistance • Online Helpdesk • Project Management • SEO Specialists • Social Media • Training

Después de sometida a revisión por el JRD Team, equipo de la comunidad encargado de evaluar la calidad y veracidad de las solicitudes de inclusión en el JRD Directory, aprenderaprogramar.com ha sido integrada en dicho directorio.

Nuestra URL en el JRD, incluyendo los datos de empresa y descripción de actividad, se encuentran disponibles en la URL: <http://resources.joomla.org/directory/other-services/freelancing/aprender-a-programar.html>

En esta URL se ofrece la siguiente información:

Aprender a programar New!

Website: www.aprenderaprogramar.com

We are software developers with several years of experience with Joomla. In addition to programming and web development we maintain a website dedicated to training and dissemination of computer programming. Learning-oriented programming from scratch. Starting from the basics (algorithms) answers a common question: how to start? It offers various tutorials in programming languages like Visual Basic, Java, PHP, and technologies such as HTML, Joomla CMS, etc.. It also offers informative articles on programming and technology. On the other hand, there are books published on the subject of algorithms, programming, and specific technologies like Joomla or Java. Finally, it has a forum and space for entertainment (photographs, free themes, humor, etc..).

What we do

We are a small development team (programmers, designers, etc..) and we offer to do work of various kinds, from small websites to portals of medium or large size. We have extensive experience with Joomla, php and mysql among other technologies (Java, J2EE, J2SE, JSP, Servlets, Struts2, Spring, Hibernate, OpenCMS, JQuery, etc.) . Before working on a website we will prepare a customized budget for client acceptance. We have a on-line international payment method through credit cards through our Bank Payment Gateway (more bank information: <http://inversores.bancacivica.com/en>). We work for different regions or countries using spanish or english for communications (using skype, e-mail, etc.). Contact details and further references are available on our web: www.aprenderaprogramar.com; you can see our profile in joomlaspanish too: <http://www.joomlaspanish.org/foros/members/ogramar/> For more details we would need a extended specification of the work. We're based in Seville (Spain). We offer seriousness and fast works.

A continuación incluimos los requisitos para formar parte del JRD, disponibles en la siguiente URL <http://resources.joomla.org/approval-checklist.html> :

JRD APPROVAL CHECKLIST

Below are details of the Joomla! Resources Directory (JRD) rules and the procedures to get final approval to be listed in the Joomla Resources Directory. Your application will be kept in pending mode until you complete our basic requirements.

If you are using the Joomla! name or any of the Joomla! logos, images or site content you must comply with the following for approval of their use:

We at the Joomla Resources Directory have a direct interest in maintaining the integrity of the Joomla brand. As such, we cannot allow violations of the Joomla trademark, logo, brand etc. to be placed in or linked from the Joomla Resources Directory.

1. You used the Joomla! name or logo in your business name. If you have the name Joomla, Joomla!, (or obvious derivatives of the word Joomla) and/or our logo next to your logo or primary business name. You need to get permission from us before we can approve your site to be linked as a resource. General rule here should be--keep away from trying to make people think you have some direct affiliation with Joomla!.

2. Is anything related to Joomla! in your domain name? If you have Joomla, Joom, Jom, anything even close in or around your business name, logo domain name, or anything questionable to our trade mark. You must first get special usage you to get approval from us to be allowed to be listed in any of our directories. We reserve the right to refuse to include you as a resource.

3. You must get approval to use the Joomla Logo on your site.

You can use conditional use logos immediately after you register for use at Open Source Matters.

Limited use logos and information is located here, as well as the brand manual which details the rules for limited use logos: <http://opensourcematters.org/logo-usage-and-brand-guide.html>
Limited use logos can only be used with prior confirmation and permission from Open Source Matters.

4. Joomla! should have a "!" and a "TM" or "®" when used in the site title, header image, or slogan or the first mention of it on the page.

On your web site please be sure to place the "!" and the superscript (TM/®) after the first instance of the use of the word Joomla on the page (this applies to you also if you use the word Joomla in your site title, header image, or as part of your slogan, etc.).

Anyone who uses any of the trademarked Joomla! logos and/or the Joomla! name as mentioned above must place this disclaimer (as issued by OSM in the approval email) in 8 point clear contrasting colors:

"The Joomla!® name is used under a limited license from Open Source Matters in the United States and other countries. ***Your business name*** is not affiliated with or endorsed by Open Source Matters or the Joomla! Project."

If the above disclaimer is not clearly visible, we will not be able to approve your submission to the JRD.

The following includes general criteria that applies to ALL submissions to the JRD:

5. Community Involvement

All submitters must be actively involved in freely supporting the Joomla! Community. There are many ways to contribute. Direct areas of community involvement that are currently considered for review are as follows:

- Active free support on the Joomla! Forums
- Active free support on Joomla-related International Forums
- The Joomla! Community Magazine
- Joomla! Day Attendance
- Joomla! Day Sponsorship
- Contributing Documentation
- Extension Development
- Active Beta Testing and Bug Squashing
- Member of a Community Working Group or Production Working Group
- Active member of a Joomla-related Google Group
- Involved in other official areas of the project that are not listed here

You do **not** have to be involved in **all** of these areas.

How the new inclusive areas are calculated

A generic point system is now in place that is a general guideline to determine your level of involvement in official areas of the project. If, for example, you are not actively involved in the Forums, but are actively involved in the Magazine and have developed some extensions - that would count for active community involvement. There are no set "5 points for this or 10 points for that", instead it is a Yes or No answer for the team. "Are they involved in this area: Yes"

6. English Only Submissions

All submissions must be written in English. Non-English submissions will be not be approved. (The website you are submitting for inclusion doesn't have to be in English, just your submission to the JRD)

7. If you don't understand why we ask you to do all this please read in detail the links provided.

We are not in the business of explaining why you need to follow the rules. If you have deep questions first read all details listed in our policies we have set in place for everyone associated with the Joomla resources directory.

8. GNU GPL Only

Beginning March 1st 2009, any Joomla! sites that distribute extensions, modules, and/or plugins either commercially or not commercially must have **ALL** extensions licensed under the GNU GPL to be accepted in the JRD. If you have a site that co-mingles GPL and non-GPL software licenses on your distributed extensions as they pertain to Joomla you will be denied.

Other Details of our approval process

*Being listed in resources.joomla.org is a privilege it is not a right.

*In some cases we call to verify that listings are accurate.

*Hosting companies have a special provision that they must provide us a working up to date stable link to a Joomla! install to review that your servers are setup correctly. With your final review please submit administration URL and Super Admin and password. Speed is not a part of the review process. We want to confirm you have PHP running with user privileges set in an optimal way for security and usability issues related to dynamic CMS (suPHP, fcgi, PHPSuExec or something equivalent). You can delete the site after our review. We will notify when we are done with the site.

*Once you are approved it does not mean your approved forever, we do retain the right to un-publish your listing at any time, without notice.
